

# Charlotte Mecklenburg Schools Transportation Efficiency Rating

NCDPI uses a funding formula to allot block grant funding to each LEA. The three primary considerations and factors include: buses operated, students transported and eligible expenditures.

Districts are encouraged to look for ways to operate more efficiently as the more efficiently a district operates, the total amount of funding from DPI.

For the 2020-21 and 2021-22 school years, due to incomplete data to support full, accurate, funding formula calculations, LEAs will be allotted funding formula transportation funds, before adjustments for ADM, benefits, fuel, and others as legislated, in an amount no lower than the 2019-20 funding formula allotment.

School districts aim for a rating as close to 100% in order to receive maximum funding from DPI.
